

ATHUL P S

Cloud DevOps Engineer

Thrissur, Kerala • +91-9605885554 • athuldevopz@gmail.com • linkedin.com/in/justathul

PROFESSIONAL SUMMARY

Cloud DevOps Engineer with 5+ years of production experience across AWS, on-premise, and air-gapped environments for enterprise and banking clients. Deep expertise in Kubernetes administration (EKS + on-prem), CI/CD/GitOps automation (GitHub Actions, GitLab CI/CD, ArgoCD), Infrastructure as Code (Terraform — HashiCorp Certified), and observability (Prometheus, Grafana, ELK Stack). Delivered measurable outcomes: 99.9%+ uptime SLA across 5+ enterprise deployments, 60% MTTD reduction, zero critical VAPT findings across three regulated banking clients, and zero rollback incidents over 12 months.

TECHNICAL SKILLS

Cloud & IaC: AWS (EC2, EKS, S3, VPC, IAM, RDS, Lambda, ECR, CloudWatch, KMS) • Terraform • Ansible • AWS CLI

CI/CD & GitOps: GitHub Actions • GitLab CI/CD • Bitbucket Pipelines • ArgoCD • Nexus Repository • Blue/Green Deployments • Canary Deployments • Vulnerability Scanning • Quality Gates

Containers & Kubernetes: Docker • Kubernetes (EKS + on-prem air-gapped) • Helm • HPA • RBAC • PDB • Network Policies • Cluster Lifecycle Management

Linux Administration: Ubuntu • RHEL • CentOS • Nginx • HAProxy • DNS • iptables • LVM • systemd • TLS/SSL • NFS • sFTP • Firewalls

Observability & Monitoring: Prometheus • Grafana • ELK Stack (Elasticsearch, Logstash, Kibana) • Graylog • OpenSearch • CloudWatch • SLI/SLO Alerting

Databases & Storage: MongoDB (Replica Sets) • Redis • S3 Lifecycle Management • ECR/Nexus Lifecycle Pruning

DevSecOps & Security: VAPT Remediation • CVE Triage • IAM Least-Privilege • RBAC • Secrets Management • VPC Segmentation • Nginx/HAProxy Hardening • Pipeline Security Scanning

Scripting & Automation: Bash/Shell • Ansible Playbooks • systemd Services • Auto-Remediation Scripting

PROFESSIONAL EXPERIENCE

Cloudcontrol • *Cloud DevOps Engineer* • June 2022 – Present

End-to-end DevOps ownership for 5+ enterprise and banking clients across on-premise, air-gapped, and AWS environments.

- **Production Availability:** Sole DevOps owner for 24x7 production systems across 5+ enterprise and banking clients; maintained 99.9%+ uptime SLA on Kubernetes deployments; led DR planning, runbook authorship, and live failover/switchover procedures.
- **CI/CD & GitOps:** Designed and maintained GitHub Actions, GitLab CI/CD, Bitbucket, and ArgoCD pipelines for 15+ containerised microservices; integrated Nexus with quality gates and vulnerability scanning; Blue/Green and Canary strategies achieved zero rollback incidents over 12 months.
- **Kubernetes & Container Administration:** Administered on-prem air-gapped and AWS EKS clusters — HPA, RBAC, PDB, Helm charts, network policies, and node pool lifecycle management; managed Ubuntu, RHEL, and CentOS servers with kernel tuning, iptables, LVM, Nginx, and HAProxy.
- **Cloud & IaC:** Provisioned and managed EC2, EKS, S3, VPC, IAM, RDS, Lambda, and ECR on AWS; engineered Terraform modules with remote state and multi-environment support; enforced cost controls, compliance tagging, and KMS-based encryption policies.
- **Observability & Incident Response:** Implemented Prometheus/Grafana SLI/SLO alerting — reduced MTTD by 60% (18 min → 7 min); built ELK Stack, Graylog, and OpenSearch log management pipelines with audit-compliant 90-day retention; owned on-call response and post-incident analysis for production-critical alerts.
- **DevSecOps & VAPT:** Delivered zero critical VAPT findings across three regulated banking clients; triaged and remediated 12 CVEs; hardened Nginx, HAProxy, IAM, and VPC configurations; integrated security scanning and vulnerability gates directly into CI/CD pipelines.
- **Automation & Self-Healing:** Authored Bash auto-remediation scripts for OOM, disk saturation, and cert expiry — reduced on-call noise by ~40%; managed MongoDB replica sets with automated backup/restore; maintained ECR/Nexus pruning to control artifact storage costs.
- **Team Enablement:** Onboarded 5+ dev/QA teams across distributed locations onto CI/CD workflows; delivered runbooks, DR plans, postmortems, and deployment documentation for client-facing engagements.

KTUNotes • *Founder & Platform Engineer* • June 2021 – June 2022

Conceived, built, and operated a production-grade e-learning platform for the KTU B.Tech student community — sole engineer with end-to-end ownership of product, infrastructure, CI/CD, scaling, and operations.

- Scaled platform to 572,000+ monthly unique visitors (Cloudflare-verified) as the sole infrastructure owner — a traffic volume comparable to mid-tier commercial platforms, managed without a dedicated ops team or cloud budget; sustained 99%+ uptime through exam-season load spikes.

- Architected full AWS production infrastructure (EC2, Nginx, Redis, Ubuntu) from scratch; implemented Redis caching, Nginx performance tuning, and Git-based CI/CD pipelines to handle real high-volume traffic; deployed Docker containers, Kubernetes orchestration, and GitOps workflows directly on live production.
- Built a real-time alert system via custom Bash pipelines reaching 70,000+ active Telegram subscribers — demonstrating full product ownership: infrastructure engineering, automation, and community engagement at scale.

KEY ACHIEVEMENTS

- **Banking-Grade Reliability** — 99.9%+ uptime SLA and zero rollback incidents over 12 months across 15+ microservices for 5+ enterprise Kubernetes deployments
- **Platform Scale from Scratch** — Sole engineer behind KTUNotes reaching 572,000+ monthly unique visitors; built and operated full AWS infrastructure independently under real peak load
- **Observability Impact** — Prometheus/Grafana SLI/SLO implementation cut MTTD by 60% (18 min → 7 min); Bash auto-remediation reduced on-call noise by ~40%
- **Regulated Security Record** — Zero critical VAPT findings across three banking clients; 12 CVEs remediated; full security audit compliance maintained over 2+ years

CERTIFICATIONS

- HashiCorp Certified: Terraform Associate (004) — 2025
- AWS Certified Cloud Practitioner — Amazon Web Services — 2022

EDUCATION

B.Tech, Electronics & Communication Engineering • APJ Abdul Kalam Technological University, Kerala • 2015 – 2019
