

ATHUL P S

Cloud DevOps Engineer

Location: Thrissur, Kerala | Phone: +91-9605885554 | Email: hi@justathul.com | Portfolio: justathul.com | LinkedIn: justathul

PROFESSIONAL SUMMARY

Cloud DevOps Engineer with 4+ years of experience building and operating mission-critical infrastructure for enterprise and banking clients across AWS, on-premise, and air-gapped environments. Specialises in Kubernetes administration, CI/CD pipeline automation, and production reliability engineering. Delivered 99.9%+ uptime SLA, reduced incident detection time by 60%, and achieved zero critical security findings across three banking audits.

TECHNICAL SKILLS

Cloud and IaC: AWS (EC2, EKS, S3, VPC, IAM, RDS, Lambda, ECR, CloudWatch, KMS); Terraform (HashiCorp Certified - modules, remote state, multi-env); Ansible (playbooks, roles); AWS CLI

CI/CD and Automation: GitHub Actions, GitLab CI/CD, Bitbucket Pipelines, ArgoCD (GitOps); Nexus artifact repository; Blue/Green and Canary deployments; vulnerability scanning; quality gates

Containers and Kubernetes: Docker (multi-stage builds, ECR lifecycle); Kubernetes / EKS - HPA, RBAC, PDB, Helm, network policies; on-prem air-gapped clusters; node pool management

Linux Administration: Ubuntu, RHEL, CentOS - kernel tuning, iptables, LVM, systemd; Nginx, HAProxy, Apache/Tomcat; DNS, TLS/SSL, firewalls, NFS, CA management

Observability and Monitoring: Prometheus, Grafana (SLI/SLO dashboards), ELK Stack, Graylog, OpenSearch, CloudWatch; SLA/SLO alerting; incident response; 99.999% availability monitoring

Security (DevSecOps): VAPT remediation, CVE triage, IAM least-privilege, RBAC, secrets management, Nginx/HAProxy hardening, VPC segmentation, TLS/SSL; security scanning in pipelines

Databases: MongoDB (replica sets, backup/restore, oplog monitoring); Redis; ECR/Nexus artifact lifecycle management

Scripting: Bash/Shell (auto-remediation, automation); Ansible playbooks; systemd service management

PROFESSIONAL EXPERIENCE

Cloud DevOps Engineer | Cloudcontrol

(June 2022 - Present)

Primary DevOps engineer owning end-to-end production reliability for 5+ enterprise and banking clients across on-premise, air-gapped, and AWS environments.

- **Production Reliability:** Maintained 99.9%+ uptime SLA across 5+ enterprise Kubernetes deployments; led DR planning, failover procedures, and incident response.
- **CI/CD Pipelines:** Built and owned GitHub Actions, GitLab CI/CD, Bitbucket, and ArgoCD GitOps pipelines for 15+ microservices; Blue/Green and Canary strategies delivered zero rollback incidents over 12 consecutive months.
- **Kubernetes and Containers:** Operated production Kubernetes clusters (on-prem air-gapped + EKS); configured HPA, RBAC, PDB, Helm charts, Nginx/HAProxy, and network policies.
- **Cloud Infrastructure:** Provisioned and managed EC2, EKS, S3, VPC, IAM, RDS, Lambda via Terraform; reduced provisioning time with reusable modules; enforced cost controls and compliance tagging.
- **Observability:** Built Prometheus/Grafana SLI/SLO alerting stack - cut MTTD by 60% (18 min to 7 min); deployed ELK + Graylog audit-compliant logging with 90-day retention.
- **Security and Compliance:** Achieved zero critical VAPT findings across three banking audits; remediated 12 CVEs; hardened Nginx, HAProxy, IAM policies, and VPC configurations.
- **Automation:** Authored Bash self-healing scripts for 3 recurring failure patterns (OOM, disk saturation, cert expiry) - reduced on-call noise by ~40%.
- **Team Enablement:** Onboarded 5+ dev/QA teams onto CI/CD workflows; authored runbooks, DR plans, postmortems, and deployment documentation.

PROJECTS

KTUNotes | E-Learning Platform | Founder

(2021 - 2022)

Founded, built, and scaled a high-traffic e-learning platform for KTU B.Tech students serving 500K+ monthly unique visitors (Cloudflare-verified), owning the complete stack from AWS infrastructure to CI/CD pipelines and operations.

- **Infrastructure:** Designed and maintained a full Linux-based AWS stack (EC2, Nginx, Redis, Ubuntu); sustained 99%+ uptime through peak traffic spikes using Git-based deployments and Redis caching strategies.
- **Scale and Automation:** Applied Kubernetes, Docker, GitOps, and CI/CD pipelines to live production; built a Telegram Bot with Bash automation pipelines delivering real-time alerts and updates to 70,000+ active subscribers.
- **Operations:** Managed DNS, SSL/TLS, Nginx reverse proxy, CDN (Cloudflare), and server monitoring end-to-end across the platform lifecycle.

CareerLook | Pan-India IT Job Alert Platform

Built and operated a pan-India IT job alert and listing platform aggregating curated DevOps, Cloud, and tech job opportunities across major tech hubs and delivering them to thousands of subscribers in real time.

- **Platform Infrastructure:** Designed and deployed full-stack AWS infrastructure; managed DNS, SSL/TLS, Nginx reverse proxy, and automated job aggregation and content delivery pipelines.
- **Subscription Alert System:** Built a subscription-based job alert system delivering real-time notifications via WhatsApp (primary), Telegram, and web channels to thousands of active subscribers across India; automated delivery pipelines using Bash scripting.
- **Growth:** Grew platform reach organically across India's major IT hubs through consistent automated delivery and a reliable notification system.

CERTIFICATIONS

- HashiCorp Certified: Terraform Associate (004)
- AWS Certified Cloud Practitioner - Amazon Web Services

EDUCATION

B.Tech, Electronics and Communication Engineering | 2015 - 2019

APJ Abdul Kalam Technological University, Kerala
